Email: kiranruvva2004@gmail.com

GitHub: <https://github.com/kiranruvva23309>

Mobile: +91 7981362012

SKILLS

Languages:	Python, C, C++ SQL, Java
Libraries/Technologies:	NumPy, Pandas, Matplotlib, Scikit-learn, Seaborn, HTML and CSS
Tools/Platforms:	MS Excel, Power BI, Jupyter Notebook, MS SQL Server
Soft Skills:	Problem-Solving, Team Lead & Player, Project Management and Adaptability

PROJECTS

Smart Parcel Tracker | C++, Data Structures & Algorithms, File Handling | [GitHub](#) Jul' 25

- Built a secure parcel management platform enabling customers, delivery agents, and administrators to track shipments, access smart lockers, and oversee operations in real time
- Implemented core data structures including arrays, linked lists, queues, and hash tables to organize parcel data, locker allocation, authentication, live tracking updates, OTP-based access, and role-based dashboards
- Optimized delivery workflows by enhancing tracking accuracy, parcel handling efficiency, and increasing transparency across the system, demonstrating strong proficiency in data structures and system design

Sales Analysis Dashboard | Microsoft Excel (Pivot Tables, Slicers, Charts), Data Analysis | [GitHub](#) Apr' 25

- Designed a sales analytics dashboard to evaluate Flipkart's performance, uncover trends, and provide segment-wise insights for faster decision-making
- Constructed an interactive Excel dashboard using pivot tables, slicers, and advanced charts to visualize KPIs such as total sales, quantity, profit, and regional, category and segment performance across 2019–2020
- Identified key business insights including top-performing categories, high-profit regions, and monthly sales patterns, enhancing reporting accuracy and data-driven decision-making

Flipkart Sales Analysis | Python, Pandas, Matplotlib, Seaborn, Jupyter Notebook | [GitHub](#) Apr' 25

- Formulated a data analytics project to examine Flipkart sales data, uncovering patterns in monthly trends, category performance, profitability, and customer behavior
- Performed data cleaning, preprocessing, and analysis using Python libraries including Pandas, Matplotlib, and Seaborn, generating visualizations such as line charts, scatter plots, bar charts, and segment comparisons
- Generated actionable insights by identifying sales trends, profitable regions, high- and low-performing categories, and segment-level purchasing behavior, improving business understanding and decision support

TRAINING

Advanced Data Structure | [Certificate](#) Jun' 25 – Aug' 25

Skill Development - Lovely Professional University

- Completed an advanced Data Structures and Algorithms program in C++, developing a Smart Parcel Locker project to manage parcel storage, retrieval, and tracking efficiently
- Applied core data structures such as Linked Lists, Trees, and Graphs to design and implement scalable solutions that support efficient data organization and system functionality
- Implemented efficient sorting and searching algorithms to optimize system performance, improve data retrieval speed, and ensure reliability across different use cases

CERTIFICATES

Cloud Computing course by Swayam NPTEL Certificate	May'25
Computer Communications course by Coursera Certificate	Nov'24
Computational Theory: Language Principles & Finite Automata Theory Certificate	Sep' 24
Python Course by CSE Pathshala Certificate	Mar'24

ACHIEVEMENTS

- Solved 130+ coding problems on LeetCode to strengthen DSA and problem-solving skills. May' 26

EDUCATION

Lovely Professional University	Phagwara, Punjab
Bachelor of Technology - Computer Science and Engineering; CGPA: 6.54	Aug' 23 – Present
Narayana Junior College	Visakhapatnam, Andhra Pradesh
Intermediate - PCM; Percentage: 90.6	Apr' 21 – Mar' 23
Narayana High School	Visakhapatnam, Andhra Pradesh
Matriculation - Percentage: 99.67	Mar' 20 – May' 21
